

Nikon Updates DSLR Line-up

The D3000 is Nikon's latest inexpensive DSLR, with a light, compact body, 11-point AF and a new Guide mode, perfect for the beginner DSLR user. The D300s updates the mid-level D300 with HD 720p video capture and a stereo microphone, faster 7fps continuous shooting and Dual CF and SD card slots. It also sees an addition of a new Quiet drive mode and a dedicated Live View and Info button.

Price: S\$988 (D3000 Kit with 18-55mm VR) / S\$2999 (D300s body only).

Notebook in the Day, Desktop at Night

The Gigabyte Booktop M1022 is named as such because of its unique ability to "transform" into a desktop by way of a special dock. This netbook also comes with a 10.1-inch TFT LED-backlit screen and can be outfitted with either an Intel Atom N270 or N280 processor. Other features include embedded HSDPA support as well as a 160GB 5400rpm hard disk.
