

# FLICK DANGEROUS

Taking your life into your own hands? Save your terror for the entertainment of pals with a proper hardy headcam

## Veho Muvi Micro

£189 | [www.boiatrader.com](http://www.boiatrader.com)

Tiny and tough, the aluminium-clad Micro has more applications than just out on the trails. Its size means that you can improvise mounts more easily, taping it into corners and places where other cameras just can't go. We used it with the extreme sports pack (£15) which adds a variety of useful mounting options. Sadly, video is standard-definition and prone to a strange rippling effect when things get moving.

### Stuff says ★★☆☆☆

Amazingly small and well suited to covert missions, but video quality isn't great.

### TECH RATER

**WATERPROOF** No

**SCREEN** No

**VIDEO** 640x480@30fps

**STORAGE** microSDHC, 8GB max.

**BATTERY** Li-ion, 2hrs

**SIZE** 55x20mmx20mm, 50g
